Drug and Alcohol Dependency is a destructive force to addicts and their loved ones. Quitting is never easy and may require months to years of rehabilitative therapy.

The goal of our professional staff at Community Services Counseling is to insure a strong recovery program for our clients. Through the understanding of chemical dependency, our professional staff will open the doors to a lifetime of growth, recovery, and peace of mind for our clients and their families.

Our Treatment System

The Matrix treatment system has been created to provide a comprehensive set of treatment options for chemically dependent populations. The foundation of the Matrix approach is a set of clinical protocols that have been constructed using the...

“best-established, empirically supported, chemical dependency treatment.”

The manuals for these protocols have been developed and evaluated with funding from the National Institute on Drug Abuse (NIDA), the Center on Substance Abuse Treatment (CSAT), and the National Institute on Alcoholism and Alcohol Abuse (NIAAA).

“The substance abuse treatment system established by Matrix offers a set of options and a level of expertise unmatched in behavioral health care.”

Cognitive Restructuring Groups

Our Cognitive Restructuring Groups will assist our clients in navigating through the court system in the most efficient manner.
